

Biomass Boiler WORKSHOP

Announcing Our **2017 Biomass Boiler Workshop**

Green Bay, Wisconsin, March 23-24, 2017

Since 2000, our workshops have been attended by over 1000 representatives from numerous facilities in the Pulp/Forest Products and Food Industries, Power Sector, Independent Power Producers and Energy-from-Waste Industries.

The workshops consist of presentations about new technological developments and results to improve the operating performance, fuel burning capacity, efficiency, and fuel economy of biomass-and other solid fuel fired boilers (mostly stoker-fired). In addition, the program will include troubleshooting and problem solving discussions of challenges that attendees bring to the workshop. Participants will benefit by: 1) learning about the latest retrofit technology for biomass boilers and associated equipment; 2) seeing how other plant operations solve their biomass boiler area problems; and 3) receiving information and solutions to their specific problems.

In the past eighteen years, JANSEN has upgraded the performance of over 80 biomass and solid waste-fueled boilers in our industries. Typically, these upgrades have achieved:

- Significant increase in biomass burning capacity and reduced fossil fuel firing.
- Improved emissions performance (CO, VOC, NOx, particulate matter).
- Reduced carryover and lower unburned carbon losses.
- Reduced erosion by limiting ash carryover.
- Reduced excess air and increased thermal efficiency.
- Boiler MACT regulatory emissions compliance.

THE WORKSHOPS ARE CO-SPONSORED BY:

*Bonus Presentation

Attendance to the workshop is FREE OF CHARGE; space is limited.

*The last workshop that was held in Seattle in September of 2016 filled up quickly!
An early sign up is therefore encouraged to guarantee your spot.*

For sign-up and to receive a detailed program of the technical presentations, workshop locations, and hotel, etc., please contact Cathy Thomas (cathy.thomas@jansenboiler.com) or by phone at 425-952-2835.
