

# Biomass Boiler WORKSHOP

## THE BIOMASS BOILER WORKSHOP COMES TO SOUTHEAST USA!

**Charleston, South Carolina  
February 21-22, 2019**

**Over the last 18 years, these workshops have benefitted more than a thousand representatives from Pulp and Paper, Forest Products and Food Industries, Power Sector, Independent Power Producers and Energy-from-Waste Industries. In February of 2019, our workshop will be held in Charleston, South Carolina!**

The workshop consists of presentations on the latest technological developments that have improved the operating performance, burning capacity, efficiency, and fuel economy of biomass and other solid fuel-fired boilers. Participants benefit by:

We'll See You In  
**Charleston,  
South Carolina**

- 1) Learning about the latest retrofit technology for biomass boilers and associated equipment.**
- 2) Seeing how other plant operations solve their biomass boiler area problems.**
- 3) Receiving information and solutions to their specific needs.**

**Since its founding in 1976, JANSEN has upgraded the performance of over 90 biomass and solid waste-fuel boilers in various industries. Typically, these upgrades have achieved:**

- Significant increase in biomass burning capacity.
- Reduced fossil fuel firing and lower carbon footprint.
- Improved emissions performance (CO, VOC, NOx, particulate matter).
- Reduced carryover and lower unburned carbon losses.
- Reduced erosion by limiting ash carryover.
- Lower excess air and increased thermal efficiency.
- Regulatory emissions compliance.

**THE WORKSHOP IS CO-SPONSORED BY:**

**Attendance to the workshop is FREE OF CHARGE but space is limited.  
Our Workshops fill up quickly! An early sign-up is required to guarantee your spot.**

**For sign-up** and to receive a detailed program of the technical presentations, workshop location, hotel information, etc., please contact Cathy Thomas by e-mail at [cathy.thomas@jansenboiler.com](mailto:cathy.thomas@jansenboiler.com) or by phone at 425-952-2835.
