

Biomass Boiler WORKSHOP

THE BIOMASS BOILER WORKSHOP RETURNS TO WESTERN CANADA!

Vancouver, British Columbia, September 20-21, 2018

Since starting in the year 2000, these workshops have benefitted over a thousand representatives from Pulp/Forest Products and Food Industries, Power Sector, Independent Power Producers and Energy-from-Waste Industries. In September of 2018, our workshop will be held in Vancouver, British Columbia!

The workshop consists of presentations on the latest technological developments that have improved the operating performance, burning capacity, efficiency, and fuel economy of biomass and other solid fuel-fired boilers (mostly stoker-fired). In addition, the program includes problem solving discussions of challenges that attendees bring to the workshop. Participants will benefit by: 1) learning about the latest retrofit technology for biomass boilers and associated equipment; 2) seeing how other plant operations solve their biomass boiler area problems; and 3) receiving information and solutions to their specific problems.

Since its founding in 1976, JANSEN has upgraded the performance of over 85 biomass and solid waste-fueled boilers in various industries. Typically, these upgrades have achieved:

- Significant increase in biomass burning capacity.
- Reduced fossil fuel firing and lower carbon footprint.
- Improved emissions performance (CO, VOC, NOx, particulate matter).
- Reduced carryover and lower unburned carbon losses.
- Reduced erosion by limiting ash carryover.
- Lower excess air and increased thermal efficiency.
- Regulatory emissions compliance.

We'll See You In Vancouver, British Columbia

THE WORKSHOP IS CO-SPONSORED BY:

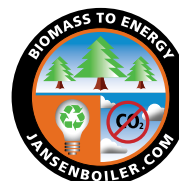

Attendance to the workshop is FREE OF CHARGE but space is limited. Our Workshops fill up quickly! An early sign-up is required to guarantee your spot.

For sign-up and to receive a detailed program of the technical presentations, workshop location, hotel information, etc., please contact Cathy Thomas by email at cathy.thomas@jansenboiler.com or by phone at 425-952-2835.
